KepClearkit
TECHNICAL SPECIFICATIONS

KIT

Manifold	**3-port, right-on or right-off**
Y-connector	**Screw, push-pull or push-click**
High-pressure tube	**50 cm**
Pressure monitoring lines	**50 cm and 100 cm**
Other contents	**Torque device, blunt needle, vented and non-vented IV sets, control syringe, haemostat**

SUPPLY

Sterility	**Supplied sterile**
Use	**Single use only**
Sterilisation	**Ethylene oxide**

INTERVENTIONAL ACCESSORIES

KepClearkit

PTCA Kit

Every Detail.
Every Procedure.

INTERVENTIONAL ACCESSORIES · PROCEDURE KITS

KepClearkit

KepClearkit is a customised PTCA kit that brings together the accessories needed for an angioplasty procedure. One sterile pack reduces preparation time in the cath lab.

Each kit is built from medical-grade components around a three-port manifold and a Y-connector. Six standard configurations are available, and kits can be customised to the needs of the centre.

Key features

Complete procedure pack
Accessories for angioplasty in one sterile kit.

Three-port manifold
Right-on or right-off handle convention.

Choice of Y-connector
Screw, push-pull or push-click valve.

High-pressure tube
50 cm line for contrast injection.

Pressure monitoring lines
50 cm and 100 cm lines.

Customisable
Contents can be adapted on request.

Design & technology

Kit concept

The kit groups the fluid-management and wire-handling accessories used in every PTCA.

- Single sterile pack
- Medical-grade materials

Core components

The standard kit covers fluid control, injection and monitoring.

- Three-port manifold
- Control syringe
- High-pressure tube and pressure lines
- Vented and non-vented IV sets

Wire and access accessories

Accessories for guidewire handling complete the kit.

- Y-connector
- Torque device
- Blunt needle
- Haemostat

Configurations

Six standard kits combine three connector types with two manifold conventions.

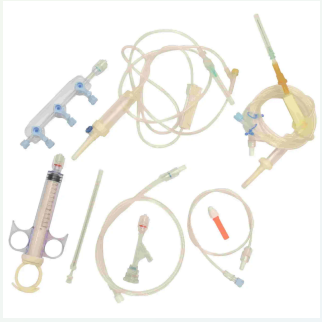

- Screw / push-pull / push-click
- Right-on / right-off manifold

Product highlights

- Manifold: 3-port, right-on or right-off
- Y-connector: Screw, push-pull or push-click
- High-pressure tube: 50 cm
- Pressure monitoring lines: 50 cm and 100 cm
- Other contents: Torque device, blunt needle, vented and non-vented IV sets, control syringe, haemostat

Intended use

KepClearkit is intended to provide the accessory devices used for fluid management and device handling during percutaneous coronary angioplasty.
